OBJECTIVE

Aspiring Software Developer with hands-on experience in full-stack web development, AI-powered applications, and cloud deployment. Skilled in building scalable applications using React.js, FastAPI, Spring Boot, and LLM-based AI agents, seeking an opportunity to contribute to innovative software solutions and real-world product development.

SKILLS

- **Languages and concepts** : Core Java, JavaScript, OOPs, Python (Basic),
- **Web** : HTML, CSS, SQL, React.js
- **Frameworks** : JDBC, Hibernate, Spring Boot, FastAPI, SQLAlchemy
- **AI & LLM** : LangGraph, LangChain, CrewAI, Groq LLM, AI Agents
- **Tools** : Eclipse, Cursor, Maven, VS Code, Docker, Git, GitHub, Render, Vercel, Railway

EDUCATION

Bachelor of Engineering (B.E) - Computer Science and Engineering PA College of Engineering, Mangalore	Dec 2021 – June 2025 CGPA: 6.7
PUC - PCMC Government PU College, Mangalore	Jun 2019 – May 2021 Percentage: 76.66%
SSLC Government High School, Panja	Jun 2015 – May 2019 Percentage: 80.32%

INTERNSHIP

Java Full Stack Intern - KodNest Technologies, Bangalore	2025
• Completed intensive training in Data Structures and Algorithms, Java, Python, HTML, CSS, Spring Framework, Spring Boot, REST APIs, MySQL, and Oracle with a strong focus on full-stack web development concepts and best practices. • Acquired hands-on experience in frontend and backend application development, database management, API integration, debugging, and responsive web design while working on real-time development tasks and projects.	

PROJECTS

AI-First CRM HCP Module (Tech Stack: React.js, FastAPI, LangGraph, Groq LLM, MySQL)

- Developed an AI-powered Healthcare Professional (HCP) CRM module for pharmaceutical field representatives using React.js and FastAPI.
- Built LangGraph-based conversational AI workflows with intelligent intent routing to automate interaction logging, editing, interaction retrieval, sentiment analysis, and AI-driven next-action recommendations for Healthcare Professional (HCP) engagement management.
- Integrated MySQL database using SQLAlchemy ORM and deployed the full-stack application using Vercel (frontend), Render (backend), and Railway MySQL.
- Designed responsive modern UI with dynamic AI cards, real-time updates, and seamless frontend-backend API integration.

Research Agent using LLM's & Search Engine (Tech Stack: Python, AI Agents, LLM)

- Developed an AI-based research agent using LangChain, CrewAI, and DeepSeek R1 to automate large-scale data collection, analysis, and summarization for faster and more efficient research.
- Integrated real-time APIs for accurate information retrieval, optimized agent workflows for better insight generation, and performed testing and debugging to ensure reliable and meaningful outputs.

E-Commerce Web Application (Tech Stack: React.js, Spring Boot, MySQL, REST APIs, Git/GitHub)

- Built full-stack e-commerce application with JWT authentication and role-based access.
- Designed and integrated RESTful APIs for product CRUD operations and user-specific cart management.
- Implemented scalable layered backend architecture with optimized entity relationships.

Pet Shop Application

- Developed a full-stack pet shop web application using HTML, CSS, JavaScript, Java, and MySQL to build a responsive and scalable system for managing users, products, and orders through a well-structured frontend and backend architecture.
- Enhanced user experience by implementing secure authentication, dynamic product features, seamless frontend-backend integration, and efficient database operations. Conducted testing and debugging to improve overall application performance and reliability.
